

AW139 Redelivery Preparation

Case Study

Appointed in Q2 2018 by a European bank to prepare the forthcoming redelivery of an offshore configured AW139 leased to a major helicopter operator

Our turn-key package included (i) **full appraisal** of the helicopter, (ii) verification of **compliance with redelivery conditions** and (iii) drawing up **strategies for remarketing** upon redelivery.

Our **proactive** and preventive **approach** to asset management **minimised pitfalls** and enabled the financier to make informed risk management decisions.
